

5-15 ACP

ACP (Attendant Control Panel) is designed for most electric hospital and care beds. It allows nursing staff not only to directly control the position functions, but also to lock the single function or whole position functions. The installation position is supposed to be out of reach of the patient (such as in the foot end broad of bed). This is to prevent inappropriate or even dangerous operation to the patient and stop the handset function.

Features :

- Control up to 4 channels while connecting with CB09, CB13 or CB17
- Beautiful streamline shape and compact design
- High-strength plastic housing protects the electronics
- ACP with keyboard can be used as an extra handset
- Protection class: IP51
- 2M straight cable
- Color: Gray-white
- Return to original position Function Button CPR (This function can let all actuators return to the original position).
- Can be used with HB5X, HB7X, HB8X series handsets.

Options :

- Protection class: IP66
- The length of coiled cable can be customized.
- We can also produce the front covers, plates and channel functions according to your requirements.
- Customized front cover (Min. Order: 1,000 pcs)

ACP Ordering Example :

ACP 4 - S - B
